
How do I submit a web page to AskJack?

Posted by AnnE - 2007/08/02 21:37

Jack

How do I submit a web page like the Sam and Lesley destination page?

This would be a great way to get linkbacks to my Blog and web site for free.

Anne

When you first join you're permitted to post to the Question Forum and Submit a Web Link.

I usually upgrade an users account when they start to take an active part in the AJ community, just like you have just done by posting a question.

Log out and login again.

Go to:

AJ Member Content

You will now see a link in the Submit Content category that allows you to post complete web pages and even build up a multi-thread mini web site.

I'm amazed other web site markeers haven't picked up this free source of inbound links.
